

DAVID N.P. KOPPSTEIN

david.koppstein@gmail.com • +61 4 8830 3039 • Skype: david.koppstein

Education

Massachusetts Institute of Technology

Ph.D, Biology

CAMBRIDGE, MA

2015

Yale University

B.S., Molecular Biophysics and Biochemistry

NEW HAVEN, CT

2001 – 2002

Experience

Viral Immunology Systems Program, Kirby Institute, UNSW

SYDNEY, AUSTRALIA

Postdoctoral Fellow

Apr '17 – present

Developing computational methods for analyzing single-cell transcriptomics data of immune cells in the context of viral infection.

Juno Therapeutics

SEATTLE, WA

Data Scientist

Jan '16 – Mar '17

Analyzed and communicated immunosequencing analyses for internal projects and external academic collaborators. Conducted analyses for internal RNA-seq and vector integration profiling projects. Served as interim manager of the data science team.

AbViro

BOSTON, MA

Data Scientist

Mar '15 – Dec '15

Designed computational pipeline for single-cell paired-chain immunosequencing. Mined receptor sequences from tumor-infiltrating lymphocytes and nominated candidates for screening. (*Acquired by Juno Therapeutics*).

David Bartel Lab, MIT

BOSTON, MA

Graduate Student

May '10 – Mar '15

Designed, implemented, and analyzed high-throughput sequencing experiments using the Illumina platform to investigate influenza's cap-snatching repertoire. Utilized 3P-seq to precisely examine alternative cleavage and polyadenylation in diverse genetic backgrounds and model organisms.

Joan Steitz Lab, Yale

NEW HAVEN, CT

Undergraduate Student

May '06 – Apr '08

Investigated the function of Herpesvirus saimiri Small U RNAs (HSURs) by sequencing candidate targets and pulldowns.

Publications

Rizzetto S, **Koppstein D**, Samir J, Singh M, Reed JH, Cai CH, Lloyd AR, Eltahla AA, Goodnow CC, Luciani F. B-cell receptor reconstruction from single-cell RNA-seq with VDJPuzzle. 2017. *bioRxiv*.

Mukhopadhyay J, Das K, Ismail S, **Koppstein D**, Jang M, Hudson B, Sarafianos S, Tuske S, Patel J, Jansen R, Irschik H, Arnold E, and Ebright RH. 2008. Myxopyronin, Coralopyronin, and Ripostatin Inhibit Transcription by Binding to the RNA Polymerase Switch Region. *Cell*. 135:295-307.

* Authors contributed equally to this publication.

Skills

Wet lab

Extensive experience with Illumina library preparation and custom experiment design: Poly(A)-Position Profiling (3P-Seq), SMART-seq, vector integration sequencing (VIS-seq), and standard RNA-seq. Experience with molecular cloning, tissue culture maintenance and transfection, Northern/Western blots, protein purification, PCR, and yeast genetics.

Dry lab

Fluent in Python and R. Expertise with modern bioinformatics tools including samtools, bedtools, STAR, RSEM, Picard, Kallisto, etc. Experience with analysing single cell sequencing data using scater, Seurat, and SC3. Experience writing scalable computational pipelines for industrial next-generation sequencing assays using Snakemake. Experience with statistical methods and machine learning techniques. Experience administering Amazon EC2 clusters using CFNCluster and Ansible. Experience managing a team of computational biologists using agile methods including Scrum and continuous integration.

Fellowships and Awards

- Juno CEO Discretionary Award for Outstanding Performance, 2016
 - NSF Graduate Research Fellowship Program, Honorable Mention, 2011
 - Yale STARS II Research Fellowship, 2007-8
-

Extracurricular

- MIT Urban Cycling Skills and Safety Clinic Organizer, 2013-4
 - Whitehead Partner for High School Science Teacher Outreach, 2012
 - MIT Cycling Team Officer, 2012-2014
-
